

ZAH Security report – AGM 2024

- ZAH has access control implemented at the facility. All members are assigned FOBs to gain access to the facility. One FOB per person (*please do not share FOBs*)
- We have three FOB readers installed - at the main gate, entrance to the main building and one at the Atash Kadeh
- In Sept '23 we managed to procure and program additional 100 FOBs; 31 have been distributed to members who requested
- 5 additional video cameras installed in Atash Kadeh to cover street and approaches to the AK
- 12 new cameras, UPS and new DVR installed in the main building, replacing cameras and equipment installed in 2013
- New camera's will cover both inside and outside perimeter
- Ongoing collaboration with HPD and DHS

ZAH Security– some issues/challenges

- The company that installed the systems went out of Business during Covid (~4Q2020). Several attempts made to reach them but no luck
- The system in the main building is very old (installed in 2013) and out of vendor support; needs upgrade / replacement
- Recommend to the ZAH EC to budget for a new modern access control system by 2025(?)
